

BUS DEPOT HORNSBERG

As part of the development of the west part of Kungsholmen in Stockholm, a former industrial area changing into dense housing and office quarters, the bus depot at Hornsberg was going to replace the existing 1930s depot, now placing the depot underground, making the ground level available for the expansion of the city. A continuous façade screen wraps the extensive facility wherever it pops up. The project is now dormant.

Client: Stockholm Public Transport (SL)
Year: 2004-
Location: Hornsberg, Kungsholmen, Stockholm
